

We love pets

But there are rules and regulations about them, and we have to think of what everyone wants. Which means keeping you happy, and the person across the site who doesn't like dogs, equally happy! So please check that:

1. I understand that by bringing animals onto the campsite, I am responsible for their good conduct.
2. I understand that animals on campsite are regulated under the DECRETO 164/2003 (Junta de Andalucía, BOJA 122 – 27 Junio), and the LEY 11/2003 (Junta de Andalucía, BOJA 237 – 10 Diciembre).
3. I am in possession of all necessary documentation & vaccinations for my pets, in accordance with above rules.
4. I understand that I am responsible for ensuring that my animals are at all times quiet, hygienic and under control.
5. I understand that dogs must be on a lead at all times while within the campsite and accept responsibility.

PET INFORMATION

Tips on pet safety whilst staying at Camping Los Gallardos

We love pets...

Under control!

Where can pets go?

Camping Los Gallardos is divided into **pet-free** and **pet-allowed** sections.

As some people have specifically asked to go into the pet free area, we ask pet owners not to take their pets into the pet free areas (which are Los Gallardos Leisure, certain cul de sacs on the campsite indicated with a “no dogs” sign, the restaurant and pool area).

Remember that some people onsite may not share the same affection for your pets that you do, and by not intruding into their allocated spaces we can all live happily alongside one another!

All pets must be controlled at all times inside the campsite. For dogs, this means they must be leashed. As the campsite is a public area, it is the responsibility of the owner to know the correct way of controlling their pets in public. Andalucia requires certain breeds of dogs to have public safety insurance and be muzzled when in public, again you should know the law and this is your responsibility.

Some people are afraid of dogs, please do not allow your dog to bark or jump up at passerbys who do not know your pet.

It's just common sense for us all!

Can my dog roam over the fields?

YES, once outside of the campsite, as long as you are not on cultivated land.

Pet poops

Sadly, it's all part of having a pet. Onsite or off it, please do the responsible thing and pop your pets poop into a sealed bag, then deposit it into the general waste bin. There are no specific pet waste disposal units onsite. And please do the same when using any of the public roads or paths offsite—animal poop in this climate quickly breeds flies!

Leishmaniasis and mosquitos

Canine leishmaniasis is a disease affecting dogs caused by Leishmania parasites transmitted by the bite of an infected phlebotomine sandfly. Pets are most at risk at dusk and dawn during the summer months. Leishmaniasis is a disease which will kill most infected animals, and can be caught anywhere along the coastal regions of the Mediterranean. However, there are treatments and vaccines available from local vets, so if you plan to spend any amount of time in the Mediterranean basin you are advised to get your pet vaccinated. It's not normally transmittable to humans.

BE KIND! LEAVE YOUR DOG BEHIND!
It's HOT !!!!
But do you know just how quickly your car's temperature heats up?

| Outside | Inside | Time to Reach |
|---------|--------|---------------|
| 75 | 100 | 10 minutes |
| 75 | 120 | 30 minutes |
| 85 | 90 | 5 minutes |
| 85 | 100 | 7-10 minutes |
| 85 | 120 | 30 minutes |
| 100 | 140 | 15 minutes |

Look after your pet in the heat!

With the sunshine and increased outdoor activity come unique needs for your pet. But you can take steps to lower his risk from many common summer and outdoor hazards.

One of the most important things to keep in mind when enjoying the summer weather with your pet is not to leave him in the car when it is warm outside. Internal car temperatures can quickly reach fatal levels. It's best to leave your pet at home during the warmer months, unless your pet will be under constant supervision and kept out of a hot car.

You might need to limit your dog's activity on hotter days. If he is panting excessively and seems lethargic, take steps to cool his body temperature immediately, as these can be early signs of heatstroke. Exposure to a fan will help lower your dog's body temperature.

For activities like swimming, you can swim together or throw a toy or ball for your dog to retrieve. Be careful, however, around swift currents and waves. Extremely cold water can cause cramps and getting chilled can put your dog at risk for hypothermia.

If there are other dogs at the campsite, it is your responsibility to keep your dog under control as mentioned above and have him on a leash (or under voice control) at all times. You can use the principles of basic obedience training/socialization as your guide.

If your pet displays unusual behavior during warm weather, contact your veterinarian immediately.
