23. Challenger	273	47. Divinity	463
24. E4	280		

We also broadcast Spanish TDT, digital televisions should detect these channels automatically and decode them for you.

Autotune your TV to pick up all channels automatically.

¹ – Channel changes depending on weekend demand between sporting events

How does TDT (Spanish "freeview") work?

TDT is Spanish digital TV. In order to view it, you need a digital decoder box, although most modern digital TVs will include one – look out for the "TDT" logo (as shown on the left).

If your TV doesn't include one, you can buy a TDT decoder from any local store for very little money.

This list is valid until further notice – we will be changing some channels in July as equipment is upgraded.
